VOTIRO

Votiro's Secure File Gateway

Secure File Gateway is the only solution that guarantees complete protection from weaponized files. Unlike detection-based file security solutions that scan for suspicious elements and block some malicious files, Votiro's revolutionary Positive Selection technology™

singles out only the safe elements of each file, ensuring every file that enters your organization is 100% safe. Votiro's new approach to file security works invisibly in the background, completely eliminating threats while ensuring zero interruption to business.

Positive Selection™

For decades, organizations have relied on predictive analytics to detect and block weaponized files. But predicting threats based on historical data is by definition imperfect. Even 99% accuracy guarantees 100% chance of attack.

In an ever-changing threat landscape, today's solutions simply aren't enough. The current security solutions, Antiviruses (AV) and Next-Gen Antiviruses (NGAV) can't keep up with undisclosed threats and zero-day exploits, while sandboxes aren't securing from even basic threats. With Votiro's deep understanding in file composition and weaponization, Votiro has developed an entirely new approach to file security. One that doesn't just block any threat it could find - it eliminates threats from entering in the first place. With Votiro, files simply don't pose a threat anymore.

Unlike detection-based file security solutions that scan for suspicious elements and block some malicious files, Positive Selection singles out only the safe elements of each file, ensuring every file that enters your organization is 100% safe.

100% Protection From Weaponized Files: The only file security solution that ensures all files that are completely safe.

Completely Secure Files, No Matter The Source:

Secure File Gateway for Email:
Completely secure every email that enters your organization.

Secure File Gateway for Web Application:
Secure all file uploads and receive documents completely risk-free.

Secure File Gateway for Web Downloads:
Secure everything employees download, no matter what it is or where it came from.

Benefits of Votiro's Secure File Gateway

✓ Easy implementation: less than 10 minutes

✓ Seamless integration with existing solutions

✓ Zero training required

✓ Supports both Cloud & On-Prem

About Votiro

Founded in 2010 by leading file security experts, Votiro is trusted by large enterprises, including top Fortune 500 companies to completely eliminate file-based threats while ensuring zero interruption to business. Headquartered in the United States, with offices in Australia, Israel and Singapore, Votiro is trusted by 400 companies and 2 million users worldwide to safely access files with complete peace of mind.
